

RAPID PREP

8 TON RAPID PREP BULK BLASTING SYSTEM

Rapid Prep's bulk unites are designed to maximize safety and productivity while minimizing downtime and maintenance costs. All bulks are standard with the popular Halok closure unit, Ergo-ladder and CEN blowdown system. These high productivity blasting systems feature multi-outlet Thompson Valve II controls that allow each operator independent control of the blast outlets. Hi-Flow Auto Air Valves are also standard which provide minimal pressure loss when using large nozzles.

- Normal closed, fail-safe valves and controls
- 4 blasting outlets
- High flow auto air valves standard for maximum productivity
- Standard 1600 cfm moisture separator for consistent abrasive flow
- Available in skid or mounted on highway and yard trailers
- Standard 150 psi ASME code pressure vessel
- 12" x 16" manway
- 3" bottom flanged port for easy vessel clean-out
