

RAPID PREP

The Dual Outlet Greener Blaster Is Here!

Rapid Prep's innovative dust-free slurry blaster provides nearly endless opportunities in the blasting and coatings industries. With a dual-chambered vessel, the unit is essentially two units in one allowing for different infrastructure; one side can run 50ft of the hose while the other operates on 150ft.

Will you be in Chicago **September 12-17th?**

Come visit our booth at the International Manufacturing Technology Show!

Curious about how well the Greener Blaster performs?

Let us show you with a **demo**. Our slurry blasting machines allow for blasting in conditions never achievable with traditional methods, while still producing in conventional applications.

These units are very popular in the **shipyard** and **marine** industry.
