

RAPID PREP

VB 2400 ABRASIVE BLAST & RECOVERY SYSTEM

Designed for contained open vacuum blasting, the VB 2400 blasts abrasive through three blasting outlets onto the surface being finished. The high-powered vacuum unit recovers the spent abrasive where the dust and waste are separated. The used abrasive is recycled and returned to the storage hopper for re-use.

FEATURES

- AIR CONSUMPTION

- Blast Pot: 325 cfm per #7 blast nozzle
- Vacuum Blasting: 150 cfm per jet vac pump
- Vacuum: 275 cfm per jet vac pump

- DUST COLLECTOR

- Filter type: cartridge closed one end
- Four filters
- 1.5 to 1 air to cloth ratio

- BLAST POT

- 3 outlets
- Thompson II valves
- 35 cu./ft. capacity
- 3 electric (12V) deadman

- STORAGE HOPPER

- 35 cu./ft. capacity
- 4" vacuum inlet

- VACUUM SYSTEM

- 2 jet vacs
- Vacuum performance: 1400 cfm @18"H

- DIMENSIONS

- 10'5" L x 4' W x 10'2" H

- WEIGHT

- 5,000 lbs.

- ELECTRIC CONTROLS

- 110 VAC
